6.2.1.2 List of Terrestrial Fauna

The following tables present the lists of terrestrial flora identified in the study area. The legend is common to all tables.

Legend

- **Latin Name** – Nomenclature from most up to date sources of data including IUCN (2011) as well as recent publications on species;
- **(1) Presence**
 - Observed – Species directly seen or indirectly recorded from field signs (tracks, droppings, territory markings, skins, feeding remains or other);
 - Potentially Present – Species not directly or indirectly identified but thought to be potentially present due to suitability of habitat recorded, current range of the species (from literature or records) or both range and habitat suitability together;
 - (Unlikely – Habitat unsuitable for species and / or species thought to be extinct as no records (from literature) taken recently (within 10 years);
- **(2) Habitat Preference** – Habitat likely to support species categorized into:

Table 6.2.1.2-1 Habitat Types for Faunal Groups

<i>Mammals</i>	<i>Birds</i>	<i>Amphibians</i>	<i>Reptiles</i>
Forest and Shrubs	Forests	Streams, ponds, rivers	Forest and Shrubs
Grassland	Shrubs		Grassland
Urban Areas	Grasslands		Rocks
Caves	Urban Fabric		Aquatic
Wetlands	Rocks and Cliffs		
	Wetlands		

Source: ERM (2011)

- **(3) Conservation Status** – Status of species listed based on level of conservation threat faced according to local Albanian and IUCN classification (both at Global and Mediterranean levels). The classification systems utilize the following categories: Critically Endangered (CR), Endangered (EN), Vulnerable (VU), Near Threatened (NT), Data Deficient (DD), and Not Evaluated (NE). For the IUCN Mediterranean listing, species are deemed Not Applicable (NA) for assessment if the species were introduced after 1500 A.D., Mediterranean population is less than 1% of their global population, and / or if less than 1% of their range lies within the region;
- **(4) Study Area Abundance** – Quantity of individuals in the species that can be found in the study area; and

 		Page 4 of 41					
		Area Code	Comp. Code	System Code	Disc. Code	Doc.-Type	Ser. No.
Project Title:	Trans Adriatic Pipeline – TAP	AAL00-ERM-641-Y-TAE-1008 Rev.: 02 / at14					
Document Title:	ESIA Albania Annex 6.2.1.2 - List of Terrestrial Fauna						

- **(5) Protection Status** – Legal protection given to the species either through local legislative provisions or through multilateral agreements or international law. Under the Bern Convention of which Albanian is a signatory species are listed under Annex II (Species of fauna strictly protected) or Annex III (Protected fauna species which can be exploited if the population level permits).

The TAP Project passes through Albania as well as Greece and Italy (which are both within the EU), therefore species protection has also been listed under the Habitats Directive for Mammals, Reptiles and Amphibians and under the Birds Directive for Bird Species.

Protection under the Habitats Directive is as follows:

- Annex II: Species of community interest whose conservation requires the designation of Special Areas of Conservation;
- Annex IV: Species of community interest in need of strict protection; and
- Annex V: Species of interest whose taking in the wild and exploitation may be subject to management measures.

Protection under the Birds Directive is as follows:

- Annex I: Birds which are the subject of special conservation measures concerning their habitat in order to ensure their survival and reproduction in their area of distribution. As appropriate, Special Protection Areas to be established to assist conservation measures;
- Annex IIa: Birds which may potentially be hunted under national legislation within the geographical land and sea area to which the Directive applies;
- Annex IIb: Birds which may potentially be hunted under national legislation only within certain specified Member States;

(6) Section – The study area location where the species was observed or is potentially present according to East (E), Central East (C.E), Central West (C.W), West (W) and North (N) Sections; and

(7) Bird Behaviour – Observed bird species were categorized as Resident (R), Summer visitors and breeders (SV), Winter visitors (W), and Migratory (MP)

Notes:

(1) Observed: direct or indirect
(1) Potentially present: suitable habitat and feasible distribution
(1) Unlikely: unsuitable habitats, extinct in the region/area

(3) IUCN Conservation Status:
CR: Critically Endangered
EN: Endangered
VU: Vulnerable
NT: Near Threatened
DD: Data Deficient
NE: Not Evaluated
NA: Not Applicable

(5) Protection status under Habitats Directive:
• Annex II: Species of community interest whose conservation requires the designation of Special Areas of Conservation.
• Annex IV: Species of community interest in need of strict protection
• Annex V: Species of interest whose taking in the wild and exploitation may be subject to management measures.

(5) Protection status under Habitats Directive:
• Annex I: Birds which are the subject of special conservation measures concerning their habitat in order to ensure their survival and reproduction in their area of distribution. As appropriate, Special Protection Areas to be established to assist conservation measures.
• Annex IIa: Birds which may potentially be hunted under national legislation within the geographical land and sea area to which the Directive applies.
• Annex IIb: Birds which may potentially be hunted under national legislation only within certain specified Member States.

(6) Section:
E: East
C.E.: Central East
C.W: Central West
W: West
N: North

(7) Bird behaviour:
R: Resident
SV: Summer visit and breeder
W: Winter visitor
MP: Migratory

Project Title: Trans Adriatic Pipeline – TAP	AAL00-ERM-641-Y-TAE-1008 Rev.: 02 / at14					
Document Title: ESIA Albania Annex 6.2.1.2 - List of Terrestrial Fauna						

The following tables provide summary data for amphibian species found in the study area:

Table 6.2.1.2-16 Conservation Status of Amphibian Species found in the Study Area

<i>Conservation Status</i>	<i>Number of species under National Red List</i>	<i>Number of species under Mediterranean Red List</i>	<i>Number of species under Global Red List</i>
Critically Endangered (CR)	0	0	0
Endangered (EN)	0	0	0
Vulnerable (VU)	1	0	0
Near Threatened (LRnt)	6	0	0
Conservation Dependent (LRcd)	1	0	0
Least Concern (LRlc)	5	11	13
Data Deficient (DD)	0	2	0
Total	13	13	13

Table 6.2.1.2-17 Protection Status of Amphibian Species found in the Study Area

<i>Protection Status</i>	<i>Number of species</i>
Nationally Protected	12
Nationally Not-protected	1
Annex II of the Bern Convention	5
Annex III of the Bern Convention	8
Annex II of the EU Habitats Directive	2
Annex IV of the EU Habitats Directive	6
Total Protected (National, European, or both)	13
Total Not-protected	0
